

Statement of Congressman Gary G. Miller
H. Res. 1199, Congratulating the Orange County Water District
On its 75th Anniversary
June 17, 2008

Madam Speaker, I rise today in support of H. Res. 1199, a resolution congratulating the Orange County Water District on its 75th anniversary. The Orange County Water District and its employees have effectively delivered innovative groundwater management, water quality, water efficiency, and environmental programs which will reduce our region's dependence on imported water.

We all know that with increased demand, decreased availability of imported water, and higher water quality requirements, future water supplies will become even more limited and expensive. If we want to sustain Southern California's economic growth and provide for a rapidly increasing population, we must ensure efficient and reliable access to water resources and pursue a modernized sanitation infrastructure. The Orange County Water District recognized that we needed a reliable source of quality water and has pursued multi-pronged strategies for capturing and recycling water that would otherwise flow downstream to the ocean.

The first initiative involves a series of agreements between the Orange County Water District, the U.S. Army Corps of Engineers, and the U.S. Fish and Wildlife Service to allow the District to conserve water behind Prado Dam. This water, which would otherwise flow downstream to the ocean, is captured to recharge the local aquifer. In addition, the Orange County Water District has partnered with the Orange County Sanitation District in the development of the Groundwater Replenishment System. This system will take highly treated sewer water and treat it above and beyond existing drinking water standards by undergoing an advanced purification process that includes two membrane filtration and treatment by ultraviolet light and hydrogen peroxide. Once purified, the water will be sent to groundwater recharge facilities or injection wells. This project is a model of self-reliance and should be replicated throughout water districts around Southern California.

The Orange County Water District is working to ensure water reliability for generations to come. This is a comforting thought to businesses as well as residents interested in moving to Orange County. Their efforts will allow our economy to grow without being restrained by potential water shortages.

I congratulate the Orange County Water District for their 75 years of service to the region and I am proud of the federal, state, and local agencies that have worked together to serve the community and address the region's growing water needs.
